SPECIFICATIONS FOR PEST CONTROL SERVICE

This specification is part of a comprehensive integrated pest management program for the Lafayette County Commission. This is a process for achieving long-term, environmentally sound pest suppression through the use of a variety of management practices. These practices include structural and procedural modifications that reduce pest access, food, moisture and harborage within the environment of the buildings occupied by staff of the Lafayette County Commission. Chemical methods are applied only on an "as needed" basis. Need is determined by pest population monitoring and previous unsuccessful attempts to solve the pest problem with non-chemical strategies. Control products are placed where they are inaccessible to staff and visitors.

Proposal Service Requirements

The Proposer shall furnish all supervision, labor materials and equipment necessary to accomplish the monitoring, trapping, chemical control methods and pest removal components of the integrated Pest Management program. The Proposer shall also provide site-specific recommendations for structural and procedural modifications to aid in pest prevention.

Terms and Payment

The service agreement shall begin on January 1, 2011, and shall continue for a period of three (3) years and from year to year thereafter until terminated. After the initial term, either party may terminate the proposed agreement upon 30 days written notice. Invoices will be paid on a monthly basis.

Re: Trip Report for Lafayette County Sheriff's Office

Dear Sheriff Lamb:

On behalf of Mr. Akram Mckee and me, it was a pleasure to meet with you and your staff on December 7, 2010. The purpose of our visit was to provide land mobile radio technical assistance.

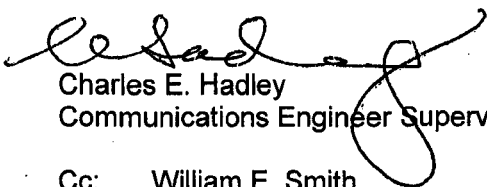

During our visit to Lafayette County, we visited two of your current VHF-High Band (VHF-HB) radio sites, including the Mayo site and the Hatch Bend site. We also discussed several issues related to your VHF-HB radio system, which mainly define our scope of work as follows:

- Provide a solution for narrowbanding the existing VHF-HB radio system
- Improve the handheld radio coverage in the eastern region of the county
- Eliminate the need of switching channels while officers are traveling throughout the county
- Provide an engineering report with budgetary estimates to resolve issues listed above
- Clarify the use of Lafayette County Sheriff's Office approved Intergovernmental Radio Communications Program (\$12.50 fund) to cover related radio system expenses

Please be advised that while our goal is to provide the engineering report in April, 2011, DMS's ability to provide timely budgetary estimates is dependent on prompt responds from vendors.

If you have any comments or questions, please call me at (850) 922-7505 or email at Charles.hadley@dms.myflorida.com.

Sincerely,

Charles E. Hadley
Communications Engineer Supervisor
